

Shahaf Segal - Full-Stack Developer

058-5278782 | shahaf100@outlook.co.il | [Linked-In](#) | [GitHub](#)

Summary

- **Dynamic Full-Stack Developer** skilled in **Node.js**, **React**, and **MongoDB**.
- **Thrives on challenges** as opportunities for growth and learning.
- Passionate about **self-learning** and **improvement**, demonstrated through participation in enrichment programs like robotics and the Genius Program and learning a new language (**Japanese**).

Skills

- **Backend:** node.js , express, RESTful api, php, mongoDB , SQLite
- **Frontend:** React, typescript, JavaScript, HTML, Css, Bootstrap
- **Other Tools:** Python, Agile Development, git, Java, sockets, Assembly.

Experience

April-June 2024: Full-Stack Developer, InterBit - Skillable

- Implemented and developed new Features , Improved existing features with each iteration, Fixed Bugs and Enhanced Mobile Experience
- Successfully built a functional educational institution management app within a 2-month deadline with a team of 4 developers and a team leader.
- Leveraged Agile Development methodology, utilizing technologies including Node.js, React, TypeScript, JavaScript, and MongoDB.
- Pitched the app to an investor who is considering its continuation.

Education

2023-2024: Full-Stack Development, IITC Academy (800 hours)

- Focused on **end-to-end applications** using technologies such as **NodeJs,React** and **MongoDB**.
- Emphasized practical application with hands-on projects, translating theoretical knowledge into tangible solutions.
- Participated in group projects and hackathons, enhancing collaborative and cooperative work skills.

2017-2020: Ort Binyamina, High-School

- **Cyber/Full-Stack Development (5 education units):** Specialized in merging frontend and backend technologies with a focus on cybersecurity. Gained proficiency in **Python**, **Assembly**, **Sockets**, and **MySQL** through project-based learning. Explored security principles to protect online applications.
- **Computer Science Major (5 education units):** Focused on **Java** programming, mastering object-oriented design to create efficient solutions/algorithms for complex problems.

Projects

2024: JS Group

- **Social Media Application:** Developed a platform allowing users to interact via chat, posts, replies, and follows using Sockets, MongoDB, Node.js and React.

Military Service

2020-2023: Home Land Command - Soldier in the "Search and Rescue" Unit.

Languages: Hebrew-Native , English- Fluent , Japanese – Beginner (Self-taught)
